

CDC pauses Johnson & Johnson injection citing ‘rare’ blood clots, but here’s what you’re not being told

Living in the modern-day matrix has become a daily exercise in the absurd.

On the one hand, we’re told that at least some of the “emergency” vaccines rushed to market could cause blood clots and kill us. Even though these incidents are said to be “extremely rare,” the CDC intervened today and [recommended a pause in the Johnson and Johnson injection](#). The AstraZeneca vaccine, you will recall, experienced the same fate for the exact same reason, blood clots, with 20 nations, mostly in Europe, hitting the pause button.

On the other hand, the media constantly quotes health officials [bemoaning the fact that there is still a sizable population of people who suffer from “vaccine hesitancy.”](#) According to this narrative, unless these holdouts are convinced to take the jab, and soon, the entire world is in grave danger.

You cannot make this stuff up.

But is there a method to their madness?

I think so.

Of the more than 4.8 million J&J shots administered in the U.S., the CDC reports six people have experienced blood clots.

Does anyone else see the irony here?

Six people with blood clots is enough to get one vaccine “paused.” But [more than 2,000 reported deaths from other vaccines](#) made by Moderna and Pfizer is no cause for concern?

Here’s what I think is going on.

The Johnson & Johnson vaccine, like the AstraZeneca vaccine in Europe, delivers a single dose and is not based on the mRNA technology. Both of these vaccines have been publicly attacked by government regulators, AstraZeneca in Europe and now J&J in the U.S. The media is also allowed to criticize them. The two other major vaccine producers, Moderna and Pfizer, base their products on the favored mRNA technology and require multiple doses – meaning people will need to get an “update” every six to 12 months. It’s a *continuous treatment* based on a single mRNA platform.

Please reread my article from Feb. 4, titled [Will you allow Big Pharma to install its 'computer operating system' into your body?](#)

Note the terminology, “**computer operating system**.”

Those are Moderna’s words. Not mine.

I quote from the Moderna website:

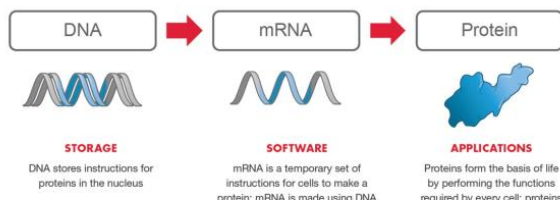

“Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that functions very much like an operating system on a computer. It is designed so that it can plug and play interchangeably with different programs. In our case, the “program” or “app” is our mRNA drug – the unique mRNA sequence that codes for a protein.

We have a dedicated team of several hundred scientists and engineers solely focused on advancing Moderna’s platform technology. They are organized around key disciplines and work in an integrated fashion to advance knowledge surrounding mRNA science and solve for challenges that are unique to mRNA drug development. Some of these disciplines include mRNA biology, chemistry, formulation & delivery, bioinformatics and protein engineering.”

Plug and play... much like a computer operating system. In case Moderna takes this page down, I have preserved it in a screenshot below:

The screenshot shows a webpage titled "Our Operating System". The text on the page reads: "Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that functions very much like an operating system on a computer. It is designed so that it can plug and play interchangeably with different programs. In our case, the 'program' or 'app' is our mRNA drug - the unique mRNA sequence that codes for a protein." Below this, it says: "We have a dedicated team of several hundred scientists and engineers solely focused on advancing Moderna's platform technology. They are organized around key disciplines and work in an integrated fashion to advance knowledge surrounding mRNA science and solve for challenges that are unique to mRNA drug development. Some of these disciplines include mRNA biology, chemistry, formulation & delivery, bioinformatics and protein engineering."

I am not suggesting that the J&J and AstraZeneca shots are safe. The instances of blood clots are surely not “extremely rare” and anyone who believes the CDC’s language is in serious need of a red pill. Take the case of Francisco Cosme, 52, of New Jersey. The [NY Post reports](#) that he was “ecstatic” to get the vaccine but ended up in critical condition with COVID about four weeks after getting the J&J shot. He is now in ICU fighting for his life.

Like Guinea pigs, we have been offered and coerced to take four unsafe “vaccines,” all of which were rushed to market under the guise of an “emergency,” which was greatly exaggerated by global health bureaucrats starting at the World Health Organization and the CDC. The media did its part to create mass hysteria by uncritically reporting whatever the corrupt WHO, CDC, Fauci, Gates, et al, said on a daily basis. Now, two of the four vaccines are being paused because the globalist transhumanists want to drive people to the other two.

The other two, the preferred shots, carry the mRNA device. These are the two shots the world will be left with after AstraZeneca and J&J have been discredited, similar to the way Hydroxychloroquin and Ivermectin were discredited.

We are witnessing a game of elimination.

Create panic in the population, then eliminate the competition to treat the panic-stricken, mind-controlled people who are afraid to come out of their houses. You can see the most influential and powerful elites all lining up behind this strategy.

- [Pope Francis has called for global governance and vaccines for all](#) while famous evangelist the [Rev. Franklin Graham tells us Jesus would want us to take the shot](#).
- Joe Biden has begged, all but demanded, [that we get these experimental injections](#).
- Major universities are starting to require the injections for students to be able to return to school.
- The media refuses to cover the real side effects, up to and including death, of the Pfizer and Moderna mRNA shots.
- Corporations have decided to persecute their employees [*and in some cases their customers*] by forcing them to get experimental injections or lose their jobs.

The above powers are cooperating with evil by helping to promote a grotesque lie – that your body is incapable of handling a virus with a survival rate of 99.7 percent. Even among middle-aged people 50 to 64 years old, the survival rate is 99.5 percent. For those over 70 the survival rate is still over 95 percent.

Donald Trump should also not be let off the hook for his role in this debacle.

Trump increasingly looks like a man trapped in his own ego. Rather than admit he made a mistake by fast-tracking these experimental gene therapies, he continues to brag about his decision to implement “Operation Warp Speed.” Trump can’t help himself. He so desperately desires to be seen as a hero that it clouds his perception of reality. Perhaps his shot has gone to his brain?

Rather than tell the truth and help calm people’s fears by presenting facts, all of the above entities – the religious leaders, the current and former presidents, the university presidents and corporate CEOs — are choosing to promote the lie. In doing so, they perpetuate the fear and panic that is necessary for [Klaus Schwab’s Great Reset](#), aka New World Order, to be implemented.

The writing is on the wall. Those with God-given discernment will soon connect the dots, if they haven’t already. Big business is aligning with big government and big religion to deceive the people.

We live in a time that requires us to pay close attention and pray for wisdom. Those lacking wisdom face a risk that is much more dangerous than a blood clot.

We are looking at something that has the potential to permanently change our physical bodies, minds, possibly even our souls. If not in the initial shots, then definitely in future shots.

Remember, Moderna brags about being able to “plug and play” different mRNA software codes in your body, all based on the same basic “platform” or operating system.

Could these regular vaccine “updates” that people are being led to believe are necessary to keep them healthy at some point include nanoparticles, tiny microchips capable of sending information about your body, your brain waves, maybe even your thoughts, to a centralized database for assessment by “authorities?”

The scientists at DARPA, a secretive unit inside the U.S. Department of Defense, are already working on an implantable microchip capable of detecting a coronavirus in the bloodstream before the onset of symptoms.

I quote below from the UK-based [Daily Mail report of April 11, 2021](#):

The team at the Defense Advanced Research Projects Agency (DARPA) have been working for years on preventing and ending pandemics.

They assess the issues and come up with ingenious solutions, which at times appear more from a science fiction novel than a working laboratory.

One of their recent inventions, they told [60 Minutes](#) on Sunday night, was a microchip which detects COVID infection in an individual before it can become an outbreak.

The microchip is sure to spark worries among some about a government agency implanting a microchip in a citizen.

Officials who spoke to the 60 Minutes team said the Pentagon isn’t looking to track your every move.

A more detailed explanation was not given.

Retired Colonel Matt Hepburn, an army infectious disease physician leading DARPA’s response to the pandemic, showed the 60 Minutes team a tissue-like gel, engineered to continuously test your blood.

COVID-tracking vaccine passports represent a convergence of technology that will eventually lead to transhumanism, the merging of man with the micro-computer chip wirelessly linked to the Internet.

Technocrats are obsessed with the idea of tracking, tracing, monitoring and measuring everything in real time. To the technocrats, human beings are nothing but units of production to be surveilled and rated for their usefulness to a socially engineered society. Once people are outfitted with these chips, the technocratic system will be in full bloom, able to monitor our bodily functions 24/7. This is the future according to the Great Reset and the Fourth Industrial Revolution.

Short of divine intervention, the only thing that can stop the momentum of this beast system from taking total power will be humanity rising up and saying, no!

Winston Churchill said [courage is the most important human virtue](#). Why? Because it's the virtue upon which all the other virtues are built.

My gut tells me this is **THE issue** that globalist power elites are trying to ram into place over the next couple of years. Everything else – gun control, federalizing the zoning laws, BLM and antifa riots, opening the borders, packing the Supreme Court – is just window dressing. While all these issues are important, they pale in comparison to the importance of, as Bill Gates said, “vaccinating the world.”

Once the system has installed its computer operating system into your body, they can at any time decide to update the software, downloading new mRNA coding that perhaps one day will offer the potential to control your mind. Yes, this is the big one, the mother of all evils. Everything else is a distraction. Take heed. Listen. Learn. Resist. If not now, when?
